SEBI conducted an investigation in the scrip of DCB Bank Limited (the "DCB") for insider trading for the period from September 19, 2015 to October 13, 2015 (the "Investigation Period") and accordingly, SEBI issued show cause notice (the "SCN") dated September 3, 2020 against our Independent Director, Mr. Rajesh Chandra Verma under Section 11(1), 11(4), 11(4A), 11B(1) and 11B(2) of Securities and Exchange Board of India Act, 1992 (the "SEBI Act") in respect of violation of regulation 4(1) SEBI (PIT) Regulations, 2015 (the "SEBI PIT Regulations"), 6(1) SEBI PIT Regulations, 12A(d) of SEBI Act, 12A(e) of SEBI Act, 15G(i) of SEBI Act, 15HB of SEBI Act in relation to trading executed by Mr. Rajesh Chandra Verma in the scrip of DCB during the Investigation Period, while holding unpublished price sensitive information (the "UPSI") in the capacity of 'designated person' as per code of conduct of DCB by virtue of his position at DCB as 'Head - Treasury and Correspondent Banking Department'. Further, it also has been alleged that, Mr. Rajesh Chandra Verma has violated the clause 6 of 'Minimum Standard for Code of Conduct to Regulate, Monitor and Report Trading by Insiders' as specified in schedule B read with Regulation 9(1) of SEBI PIT Regulations. Further, it has also been alleged that, Mr. Rajesh Chandra Verma averted unlawful loss of Rs. 34,25,077/- from the aforementioned trading executed by him in the scrip of DCB Bank. SCN has directed Mr. Rajesh Chandra Verma to show cause as to why appropriate directions under 11(1), 11(4), 11(4A), 11B(1), 11B(2) and 15G(i) of SEBI, 1992 should not be initiated against him for the loss averted by him for his trades executed in the scrip of DCB, including disgorgement of Rs. 34,25,077/-. However, Mr. Rakesh Chandra Verma is in process submitting his reply to SEBI in respect of SCN. For further details, see "Outstanding Litigations and Material Developments" on page [●]"

3. Our Company, its Directors, its Promoters are parties to certain legal proceedings. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.

Mentioned below are the details of the proceedings involving our Company, its Directors, its Promoters as on the date of this Prospectus along with the amount involved, to the extent quantifiable, based on the materiality policy for litigations, as approved by the Company in its Board meeting held on 10th August 2020.

Sr. No.	Nature of Case	No. of Outstanding cases	Amount in dispute/demanded to the extent quantifiable (₹ In Lakhs)
I.	Litigations filed by our Company		
	Civil Cases	2	114.29
II.	Litigations filed against the Company		
	Revenue Proceedings filed against our Company - Direct Tax Matters	3	739.00
III.	Showcase Notice against Independent Director	1	34.25

There can be no assurance that these litigations will be decided in favour of the Company, its Directors respectively, and consequently it may divert the attention of our management and Promoters and waste our corporate resources and we may incur significant expenses in such proceedings and may have to make provisions in our financial statements, which could increase our expenses and liabilities. If such claims are determined against us, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares. For the details of the cases please refer the section titled "Outstanding Litigation and Material Developments" on page no.169 of this Prospectus.

4. Information Technology (IT) Audit requirements from Government organizations, Statutory Bodies, PSUs, Municipalities etc. are typically awarded to us on satisfaction of prescribed pre-qualification criteria, on being empanelled and/or after following a competitive bidding process. Our business and financial condition may be adversely affected if the orders are not awarded to us.

Our company provides IT Audit services mainly to Government organizations, Statutory Bodies, PSUs, Municipalities etc. We receive orders from these organizations through a competitive bidding process which involves certain pre-qualification criteria like experience, performance, CERT-In empanelment etc. In selecting the auditors/service providers, our clients generally limit the tender to auditors having pre-qualification criteria, although price competitiveness of the bid is the most important selection criteria. The growth of our business mainly depends on our ability to obtain new orders for our services. Generally, it is very difficult to predict whether and when we will be awarded a new order. Our future results of operations and cash flows can fluctuate materially from period to period depending on the timely award of orders, commencement of work completion of orders in the scheduled time period, receiving completion of work order certificate from our clients and final realization of funds. If we fail to qualify or are unable to obtain new orders, our business and financial conditions could be adversely affected.

5. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.

Modernization and technology up-gradation is essential to reduce costs, increase the output and deliver appropriate results. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments. However, our existing testing tools or software are with latest technology and we strive to keep our technology tools and software in line with the latest technological standards. But in future we may be required to implement new technology or upgrade the software and other equipment employed by us. Further, the costs in upgrading our technology may be significant which could affect our finances and operations.

6. Our work with government clients exposes us to additional risks inherent in the government contracting environment.

Our clients include governmental entities such as ministries of the Central Government and national as well as state level public sector undertakings. Our government work carries various risks inherent in the government contracting process, which may affect our operating profitability. These risks include, but are not limited to the following:

- Government contracts are often subject to more extensive scrutiny and publicity than contracts with commercial clients. Negative publicity related to our government contracts, regardless of its accuracy, may further damage our business by affecting our ability to compete for new contracts among governmental and commercial entities;
- participation in government contracts could subject us to stricter regulatory requirements which may increase our compliance costs;
- delays in payment due to time taken to complete internal processes;
- political and economic factors such as pending elections, changes in leadership among key governmental decision makers, revisions to governmental tax policies and reduced tax revenues can affect the number and terms of new government contracts signed;
- terms and conditions of government contracts tend to be more onerous and are often more difficult to negotiate than those for commercial contracts; and
- government contracts may not include a cap on direct or consequential damages, which could cause additional risk and expense in these contracts.

7. Risk related to unionizing of employees/labour (e.g., event of protests or demonstrations causing disruption to business activities)

As on date of Draft Prospectus, we had 64 employees working at our offices. Although we have not experienced any labour disruptions in the past and do not have any unionized employees, there can be no assurance that our employees will not unionize or that we will not experience any strike, work stoppage or other industrial action in the future. Any such event could disrupt our operations, possibly for a significant period of time, result in

increased salaries and other benefits or otherwise have an adverse effect on our business, financial condition and results of operations.

8. Impact of Covid-19 pandemic to the business.

Due to COVID-19 pandemic, the Government of India as well as State Governments have imposed lockdown of various levels to encourage social distancing and prevent spread of coronavirus which has had a major impact across all industries in India. Our Company operates in service industry and has been successful in implementing work from home which has reduced the impact of pandemic on our operations. However, our business growth is dependent on tenders floated by Government, PSUs and other Statutory Organizations. Due to pandemic there could be delay by these entities in floating tenders due to which future growth, financials and cash flows of our Company may be impacted.

9. Risk related to procurement of specialized talent to carryout highly skilled tasks (availability).

Our ability to meet continued success and future business challenges depends on our ability to attract, recruit and retain experienced, talented and skilled professionals. The market for skilled employees is competitive, and the process of hiring employees with the necessary skills requires the diversion of significant time and resources. The specialized skills we require can be difficult and time-consuming to acquire and develop and, as a result, such skilled personnel could be in short supply. Competition remains intense for such qualified employees. The loss of the services of our senior management or any key managerial personnel and our inability to locate suitable or qualified replacements or our inability to recruit or train a sufficient number of experienced personnel or our inability to manage the attrition levels across different employee categories in future may incur additional expenses which could impact our business and have an adverse effect on our financial results and business prospects.

10. Risk related to high dependency of third-party tools and applications to carry out business operations (e.g., discontinuity/unavailability of software)

Delays or outages in our information technology ("IT") systems and computer networks could have a material adverse effect on our business, financial condition and results of operations. In addition, we are dependent on various external vendors for license of specific software / tools and also place reliance on these tools to efficient conduct of our operations and if we fail to fulfill their contractual obligations, it could have a material adverse effect on our business, financial condition and results of operations.

11. We may not be able to secure new contracts if we are unable to issue the requisite performance guarantees.

We are usually required to furnish our customers with performance guarantees as security for the fulfilment of our contractual obligations to procure business through tenders. In order for us to secure performance guarantees, banks and financial institutions review, among other things, our financial standing and creditworthiness. Generally, we arrange for banks to issue performance guarantees to our clients from our available banking facilities. If we do not have available banking facilities to issue the performance guarantees, we approach other banks or financial institutions to issue the performance guarantee. While we have been able to procure performance guarantees for new contracts to date, in the event that we are unable to do so and we are unable to satisfy the financial requirements prescribed by banks and financial institutions, we will not be able to procure the requisite performance guarantees and as a result, we may be unable to secure new contracts, which would have a material adverse effect on our business, financial condition, results of operations and prospects.

12. We rely on information technology systems, networks and infrastructure, and any interruption or breakdown in such systems, networks or infrastructure or our technical systems could impair our business and operations.

We have implemented various IT solutions and tools to cover key areas of our operations. Our business is also technology driven, and we rely heavily on IT software and networks and related infrastructure. As a result, our business operations and the quality of our services depend significantly on the efficient and uninterrupted operation and reliability of our information technology systems, tools, networks and related infrastructure both internal and external. For instance, a failure in technology including technical error/glitches, server breakdown

can lead to interrupted bidding, and could even lead to cancellation of bids which may result into initiation of litigation proceedings, other adverse results and could adversely affect our financial condition. In spite of regular checks and tests, our systems may be vulnerable to interruption and damage as a result of natural disasters, power loss, technical glitches, undetected errors or viruses in our software, computer viruses or loss of electronically stored data, hardware damage, disruption in communications access or infrastructure, electronic intrusion attempts, break-ins, sabotage, hacking, vandalism and other similar events which may result in cancellation of e-auctions/events. There can be no certainty that we will be able to eliminate or alleviate the risks arising from such contingencies. In addition, our systems and software, including our website, secure sockets layer encryption, firewall and IPS may contain undetected errors, defects or bugs, which we may not be able to detect and repair in time or in a cost-effective manner, or at all.

Any damage to or failure of our systems could lead to loss of data or interruptions or delays, thereby impairing our ability to effectively provide our services and could have a material adverse effect on our business, financial condition and results of operations.

13. Our revenues though largely well-diversified across all industry sectors; we do have medium-term contractual arrangements with our clients along with many clients being repeat customers year-on-year. The loss of any one or more of our clients or failure to procure repeat orders could have a material effect on our business operations, financial condition and profitability.

Hence our revenues have been and shall continue to be dependent on large number of clients across all industry and business sectors. For the financial year ended 31stMarch, 2020, 31stMarch, 2019 and 31stMarch, 2018 our top ten clients accounted for approximately 83.22%, 82.59% and 92.51% respectively of our revenue from operations. Further, we currently do not have long-term contractual arrangements with clients and conduct business with them on the basis of tender that are placed from time to time. The loss of any significant client would have a material effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these clients or that we will be able to replace these clients in case we lose any of them. Demand for our services is based on client's requirements, their preferences and also considering the price, our clients may opt for our competitors. Any loss of client base, out of our existing clients, will impact our overall sales, resulting in decline in our revenues.

While we are constantly striving to increase our client base and reduce dependence on any particular client, there is no assurance that we will be able to broaden our client base in any future periods or that our business or results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major clients.

14. We do not own our Delhi office which we have taken on leave and license basis. Any termination of agreement may require us to vacate such premises and adversely affect our business operations.

Our Delhi office is taken on leave and license and the agreement is valid till 14thMay, 2021. If the leave and license agreement under which we occupy the premises is not renewed on terms and conditions that are favorable to us, or at all, we may suffer a disruption in our operation which could have a material adverse effect on our business, financial condition and results of operations. If we do not comply with conditions of the leave and license, the licensor may terminate the leave and license, which could have an adverse effect on our operations and there can be no assurance that renewal of leave and license agreement with the licensor will be entered into. In the event of non-renewal of leave and license, we may be required to shift our office to a new location and there can be no assurance that the arrangement we enter into in respect of new premises would be on such terms and conditions as the present one. For more details on property taken on lease by our Company, please refer section "Leave and License Properties" in the chapter titled "Our Business" beginning on page 90 of this Prospectus.

15. If we fail to keep our technical knowledge, process to conduct audit and outcome of our audit confidential, we may suffer loss of reputation, competitive advantage or it may negatively impact the overall implementation of audit.

We possess extensive technical knowledge about our services and such technical knowledge has been developed through our own experiences. Our technical knowledge is an independent asset of ours, which may not be adequately protected by intellectual property rights such as patent registration or design registration. Our

technical knowledge and process to conduct audit or identify threats is protected only by secrecy. As a result, we cannot be certain that our technical knowledge will remain confidential in the long run.

Further, we conduct audit of highly sensitive organisations such as Defence, Banking, shipping and ports, regulatory authorities etc. and outcome of our audit is confidential. If certain proprietary knowledge may be leaked (either inadvertently or wilfully), at various stages of the audit process such leakage could adversely affect such critical programmes and in hand affect our goodwill.

A significant number of our employees have access to confidential information and there can be no assurance that this information will remain confidential. Moreover, certain of our employees may leave us and join our various competitors. Although we may seek to enforce non-disclosure agreements, we cannot guarantee that we will be able to successfully enforce such agreements.

In the event that the confidential or technical information in respect of our services or clients or business becomes available to third parties or to the general public any competitive advantage we may have over other companies in this sector could be compromised. If a competitor is able to reproduce or otherwise capitalise on our technology / procedures to detect threats, it may be difficult, expensive or impossible for us to obtain necessary legal protection.

Consequently, any leakage of confidential or technical information of our clients could have an adverse effect on our business, results of operations, financial condition and future prospects of our Company and our clients. Further, we may lose our licences, empanelment and our promoters and directors may face imprisonment.

16. We may be liable to our clients for damages caused by system failures, disclosure of confidential information or data security breaches, which could harm our reputation and cause us to lose customers.

Our audits involve verification of systems that are critical to the operations of our clients' businesses and benefits to our clients that may be difficult to quantify. In addition, we often have access to, or are required to collect and store, confidential customer data. It is critical to our business that our infrastructure remains secure and is perceived by clients to be secure. Breaches of our security measures or any accidental loss, inadvertent disclosure or unapproved dissemination of confidential client data could expose us, our clients or the individuals affected to a risk of loss or misuse of this information, or cause interruptions in our operations. We may be required to expend capital and other resources to protect against such security breaches, to alleviate problems caused by or to investigate such breaches, all of which could subject us to liability, damage our reputation and diminish the value of our brand name.

Although we attempt to limit our contractual liability for consequential damages in rendering our services, some of our agreements do not limit our potential liability for breaches of confidentiality, intentional infringement of intellectual property rights of third parties, non-compliance with applicable laws, fraud, breaches due to gross negligence or wilful misconduct, damages connected to compliance recall caused as a result of our negligence and we cannot be assured that such limitations on liability will be enforceable in all cases, or that they will otherwise protect us from liability for damages. Moreover, if any person, including any of our employees or former employees or sub-contractors, penetrates our network security or misappropriates sensitive data, we could be subject to significant liability from our clients for breaching contractual confidentiality provisions or privacy laws. Unauthorized disclosure of sensitive or confidential client data, whether through breach of our computer systems, systems failure, loss or theft of assets containing confidential information or otherwise, could render us liable to our customers for damages, damage our reputation and cause us to lose clients.

17. If we fail to maintain an effective system of internal controls, we may not be able to successfully manage, or accurately report or successfully manage risks and avoid fraud.

Effective internal controls are necessary for us to deliver reliable audit reports and effectively avoid fraud. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may deteriorate over time, due to evolving cybercrime and IT related frauds. There can be no assurance that deficiencies in our internal controls will not arise in the future, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls. Any inability

on our part to adequately detect, rectify or mitigate any such deficiencies in our internal controls may adversely impact our ability to accurately report, or successfully manage risks and avoid fraud.

18. Contingent liabilities could adversely affect our financial condition. Crystallization of any of these contingent liabilities may adversely affect our financial condition.

The details of contingent liabilities as indicated in our Restated Financial Statements and also certified by our statutory auditors were as follows:

(₹ in Lakhs)

Particulars	Restated Financial Year Ended		
	March 31, 2020	March 31, 2019	March 31, 2018
Contingent Liabilities:			
Letter of Credit (LCs) / Bank Guarantee (BG)	203.75	181.65	200.54
Total	203.75	181.65	200.54

In the event that any of our contingent liabilities materialize, our business, financial condition and results of operations may be adversely affected. Furthermore, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the current fiscal year or in the future. For further information, please see section titled “Contingent Liabilities” under “Financial Statements” on page 152 of this Prospectus

19. Any defects in our service could make our company liable for customer claims or regulatory actions which in turn could affect our Company’s results of operation.

We are into service industry and have Government bodies, local authorities, PSU’s as well as private sector Companies as our clients. Our business is dependent mainly on how we maintain our relationship with our existing clients which helps to retain existing clients and to attract the new ones. Hence an unsatisfied client who may have to face any regulatory issue or whose systems are prone to threat in spite of audit conducted by us; due to our negligence may be more damaging in our business than in other businesses. Our activities may subject us to the risk of significant legal liabilities to our clients and aggrieved third parties. In recent years, the volume of claims and amount of damages claimed in litigation and regulatory proceedings due to cyber-crimes, IT Frauds, spoofing etc. have been increasing in spite of strict regulations and public awareness. These risks often may be difficult to assess or quantify and their existence and magnitude often remain unknown for substantial periods of time. Hence, we may incur significant legal expenses in defending against litigation by authorities and our clients against us. Substantial legal liability or significant regulatory action against us could have material financial effects on our Company or could even cause cancelling our empanelment with different authorities including CERT– In and NICS and significantly harm to our reputation, which could harm our business prospects.

20. Our management will have broad discretion in how we apply the Net Proceeds, including interim use of the Net Proceeds, and there is no assurance that the objects of the Issue will be achieved within the time frame expected or at all, or that the deployment of the Net Proceeds in the manner intended by us will result in any increase in the value of your investment. Further, the funding plan has not been appraised by any bank or financial institution. Hence, the deployment of the Net Proceeds from the Issue which are based on our Company’s management, it will have flexibility in utilizing the Net Proceeds from the Issue.

Our Company intends to use the Net Proceeds from the Issue for the purposes described in section titled “Objects of the Issue” on page 65 of this Prospectus. Subject to this section, our management will have broad discretion to use the Net Proceeds from the Issue, and investors will be relying on the judgment of our management regarding the application of the Net Proceeds from the Issue. The funding plans are in accordance with our own estimates and have not been appraised by any bank, financial institution or any other external agency. Our Company may have to revise its management estimates from time to time on account of various factors beyond its control, such as market conditions, competitive environment and consequently its requirements may change. Additionally, various risks and uncertainties, including those set forth in this section may limit or delay our efforts to use the Net Proceeds to achieve profitable growth in its business. Our Board will have significant flexibility in temporarily investing the Net Proceeds of the Issue. Accordingly, the use of the Net Proceeds for purposes identified by our management may not result in actual growth of its business, increased profitability or an increase in the value of your investment.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue, at a price and manner as specified in SEBI ICDR Regulations. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilization of our Net Proceeds, even if such variation is in our interest. Further, we cannot assure you that our Promoters or the controlling shareholders will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price which may be prescribed by SEBI. Accordingly, prospective investors in this Issue will need to rely upon our management's judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue and our business and financial results may suffer.

Our Promoters have been actively involved in the day to day operations and management since the induction into the Company.

Further, one of our Promoters is an investor in another company unrelated to our business which has been not been doing business for the last few years. If the Promoters divert their attention to other businesses or companies at a later stage, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Further, we also depend significantly on our Key Managerial Persons for executing their day to day activities. 23. *We have entered into related party transactions in the past and may continue to do so in the future.*

Our Company has entered into various transactions with our Promoter and Directors. While we believe that all such transactions are conducted on arm's length basis, there can be no assurance that we could not have achieved more favorable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of

operation. For details on the transactions entered by us, please refer to chapter titled “*Related Party Transactions*” beginning on page no. 135 of the Prospectus.

As on date, we have not made any alternate arrangements for meeting our requirements for the Objects of the Issue. We meet our expansion and working capital requirements through our own funds, debt and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future could result in us being unable to meet our requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not yet identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue Proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer section titled “*Objects of the Issue*” on page 65 of this Prospectus.

While we take care to ensure that we comply with the intellectual property rights of third party, if any, we cannot determine with certainty as to whether we are infringing on any existing third-party intellectual property rights, which may force us to alter our technologies, obtain licenses or cease some of our operations. We may also be susceptible to claims from third parties asserting infringement and other related claims. If claims or actions are asserted against us, we may be required to obtain a license, modify our existing technology or cease the use of such technology and design a new non-infringing technology. Such licenses or design modifications can be extremely costly. Furthermore, necessary licenses may not be available to us on satisfactory terms, if at all. unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

- 29. Our insurance coverage may not adequately protect us against all material hazards and the policies do not cover all risks, specifically risks like liability risk, loss of profits and workmen's compensation. In the event of the occurrence of such events, our insurance coverage may not adequately protect us against possible risk of loss.**

Our business could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which is not covered by insurance. There can be no assurance that the terms of our insurance policies will be adequate to cover any damage or loss suffered by our Company or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim.

After the completion of this IPO, our Promoters and Promoter Group will beneficially own 71.51% of our post-Issue equity share capital. As a result, our Promoter and Promoter Group may have the ability to control our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as the Promoter Group continues to exercise significant control over the Company, they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. The Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

- 31. We have relied on the industry report generated by Data Security Council of India (DSCI) which has been used for industry-related data in this Prospectus and such data has not been independently verified by us. Prospective investors are advised to understand and take adequate precaution while relying on such information.**

We have relied on an industry report titled "INDIA Cybersecurity Services Landscape" of 2020 and "Cyber Security India Market – What lies beneath" of December, 2019 published by the Data Security Council of India (DSCI), a premier industry body on data protection in India, set up by NASSCOM. The said Report, which has been used for industry related data that has been disclosed in this Prospectus, uses certain methodologies for market sizing and forecasting. completeness of the data. Accordingly, investors should not place undue reliance on, or base their investment decision solely on, this information. For further details, please see section titled “Industry Overview” on page 78 of this Prospectus.

32. Any increase in our employee costs may adversely affect our margins and results.

We have seen an increasing trend in manpower costs in India, which has had a direct impact on our employee costs and consequently, on our margins. We may incur higher costs in the future as we continue to increase our employees. We cannot assure you that as we continue to grow our business in the future, our employee costs coupled with operating expenses will not significantly increase. Any of these factors could adversely affect our business, financial condition and results of operations.

33. Our inability to manage our growth may disrupt our business and reduce our profitability.

A principal component of our strategy is to continue to grow by expanding the size and geographical scope of our business. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous upgradation increases the challenges involved in financial management, retaining high quality human resources, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

34. We may not be successful in implementing our business strategies.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

35. Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

36. Our Company may not be able to pay dividends in the future.

Our Company has declared and paid dividends for financial year 31stMarch, 2020, 31stMarch, 2019 and 31stMarch, 2018. Any dividends to be declared and paid in the future are required to be recommended by our Board of Directors and approved by its Shareholders, at their discretion, subject to the provisions of the Articles of Association and applicable law, including the Companies Act. Our Company’s ability to pay dividends in the future will depend upon our future results of operations, financial condition, cash flows, sufficient profitability, working capital requirements and capital expenditure requirements. We cannot assure you that we will generate sufficient revenues to cover our operating expenses and, as such, pay dividends to our Company’s shareholders in future consistent with our past practices, or at all. For details pertaining to dividend declared by our Company in the past, see section titled “Dividend Policy” on page 136 of this Prospectus.

37. The rate of interest for the loans obtained by us from the bank is variable and any increase in interest rates may adversely affect our results of operations and financial condition.

Our Company is susceptible to changes in interest rates and the risks arising there from. Our sanction letter provides for interest at variable rates with a provision for the periodic resetting of interest rates. Further, the bank is entitled to change the applicable rate of interest depending upon the policies of the RBI and a contractually agreed spread, and in the event of an adverse change in our Company's credit risk rating. For further details of interest payable on our borrowings, please see section titled "Financial Indebtedness" on page 167 of this Prospectus. As such, any increase in interest rates may have an adverse effect on our business, results of operations, cash flows and financial condition.

38. Any downgrading of our credit rating by a domestic credit rating agency may increase interest rates for our future borrowings, which would increase our cost of borrowings, and adversely affect our ability to borrow on a competitive basis.

Our credit rating could be downgraded due to various factors, including factors which may be outside our control. Any future downgrade of our credit ratings may increase interest rates for refinancing our borrowings, which would increase our cost of borrowings, and may have an adverse effect on our future issuances of debt and our ability to borrow on a competitive basis. Further, any downgrade in our credit ratings may also trigger an event of default or acceleration of repayment of certain of our borrowings. If any of these risks materialise, it could have a material adverse effect on our business, results of operations and financial condition.

39. There is no guarantee that our Equity Shares will be listed on the Stock Exchange in a timely manner or at all.

In accordance with Indian law and practice, permission to list the Equity Shares will not be granted until the Equity Shares have been issued and allotted. Approval will require all other relevant documents authorizing the issuing of our Equity Shares to be submitted. There could be a failure or delay in listing our Equity Shares on the Stock Exchange. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

40. The requirements of being a listed company may strain our resources.

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchange and compliances of SEBI Listing Regulations which will require us to file audited annual and unaudited half yearly and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

41. The average cost of acquisition of Equity Shares by our Promoters is lower than the issue price.

Our Promoters' average cost of acquisition of Equity Shares in our Company is as under:

Particulars	Average Cost of Acquisition(In ₹)
Anjay Agarwal	6.19
Venugopal Dhoot	9.52
Ruchi Agarwal	1.72

Since, the average cost of acquisition by our Promoters may be lesser than the Issue Price, investors who purchase the Equity Shares may do so at a cost that is higher than the average cost of acquisition of the Equity Shares of our Promoters.

42. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

43. There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹10,000 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the Stock Exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

RISKS RELATING TO THE EQUITY SHARES AND THE ISSUE

44. There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment.

There is no guarantee that our Equity Shares will be listed on the Stock Exchange in a timely manner or at all and any trading closures at the Stock Exchange may adversely affect the trading price of our Equity Shares. Prior to the Issue, there has not been a public market for the Equity Shares. Further, we cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchange or how liquid that market will become. If an active market does not develop, you may experience difficulty selling the Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of the Equity Shares on the Stock Exchange may fluctuate after listing as a result of several factors, including the following:

- Volatility in the Indian and other Global Securities Markets;
- The performance of the Indian and Global Economy;
- Risks relating to our business and industry, including those discussed in this Prospectus;
- Strategic actions by us or our competitors;
- Investor perception of the investment opportunity associated with the Equity Shares and our future performance;
- Adverse media reports about us or our shareholders;
- Future sales of the Equity Shares;
- Variations in our half yearly results of operations;

- Differences between our actual financial and operating results and those expected by investors and analysts;
- Our future expansion plans;
- Perceptions about our future performance or the performance of nutraceutical sector companies generally;
- Performance of our competitors in our industry and the perception in the market about investments in the IT sector;
- Significant developments in the regulation of the IT Audit industry in our key locations;
- Changes in the estimates of our performance or recommendations by financial analysts; and
- Significant developments in India's fiscal and environmental regulations. There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share Price could fluctuate significantly as a result of market volatility. A decrease in the market price of the Equity Shares could cause you to lose some or all of your investment.

45. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of shares in an Indian company are generally taxable in India. However, any gain realized on the sale of listed equity shares on or before March 31, 2018 on a stock exchange held for more than 12 months were not subject to long term capital gains tax in India if Securities Transaction Tax (“STT”) was paid on the sale transaction and additionally, as stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares on or after October 1, 2004, except in the case of such acquisitions of equity shares which were not subject to STT. The Finance Act, 2018, has now levied taxes on such long-term capital gains exceeding ₹100,000 arising from sale of Equity Shares on or after April 1, 2018, while continuing to exempt the unrealized capital gains earned up to January 31, 2018 on such Equity Shares. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of equity shares will be exempt from taxation in India in cases where an exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of equity shares.

46. There are restrictions on daily/weekly/monthly movements in the price of the Equity Shares, which may adversely affect a shareholders' ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by all stock exchange in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchange. The percentage limit on circuit breakers is set by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

47. Any future issuance of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us, including issuing employee stock options and exercise of employee stock options may dilute your shareholding in our Company, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoters or other significant shareholders may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences for us including difficulty in raising debt or equity financing. In addition, any perception by investors that such issuances or sales might occur may also affect the trading price of our Equity Shares. We cannot assure you that we will not offer Equity Shares or that our shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

48. *The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.*

The Issue Price of the Equity Shares will be determined by our Company in consultation with Lead Managers, and through the Fixed Price Process. This price will be based on numerous factors, as described under section titled “Basis for Issue Price” on page 72 and may not be indicative of the market price for the Equity Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that the investor will be able to resell their Equity Shares at or above the Issue Price.

49. *The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares. The trading volume and market price of the Equity Shares may be volatile following the Issue.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the stock exchange may not develop or be sustained after the Issue. Moreover, the Issue Price will be determined through the Fixed Price Process and may not be indicative of the price of our Equity Shares at the time of commencement of trading of our Equity Shares or at any time thereafter. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Further, the market price of the Equity Shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- half yearly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts’ recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments; announcements by third parties or governmental entities of significant claims or proceedings against us;
- new laws and governmental regulations applicable to our industry;
- additions or departures of key management personnel;
- changes in exchange rates;
- changes in the price of oil or gas;
- fluctuations in stock market prices and volume; and
- general economic and stock market conditions.

Changes in relation to any of the factors listed above could adversely affect the price of the Equity Shares.

EXTERNAL RISK FACTORS

50. *The outbreak of Novel Coronavirus, or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition and results of operations.*

The outbreak, or threatened outbreak, of any severe communicable disease (particularly the Novel Coronavirus) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our customers and suppliers, which could adversely affect our business, financial condition and results of operations. The outbreak of Novel Coronavirus has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, shelter in place orders, and shutdowns. These measures have impacted and may further impact our workforce and operations, the operations of our customers, and those of our respective vendors and suppliers. There is currently substantial medical uncertainty regarding Novel Coronavirus and no government-certified treatment or vaccine is available. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of Novel Coronavirus remain uncertain and could be severe. Our ability to meet our ongoing

disclosure obligations might be adversely affected, despite our best efforts. If any of our employees were suspected of contracting Novel Coronavirus or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of Novel Coronavirus will cause an economic slowdown and it is possible that it could cause a global recession. The spread of Novel Coronavirus has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, partners, and suppliers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and our ability to perform critical functions could be harmed.

The extent to which the Novel Coronavirus further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and the actions taken globally to contain the coronavirus or treat its impact, among others. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events.

We are still assessing our business operations and system supports and the impact Novel Coronavirus may have on our results and financial condition, but there can be no assurance that this analysis will enable us to avoid part or all of any impact from the spread of Novel Coronavirus or its consequences, including downturns in business sentiment generally or in our sector in particular. The degree to which Novel Coronavirus impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people.

Further in case the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company.

51. Financial instability in other countries may cause increased volatility in Indian financial markets.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business, our future financial performance and the prices of the Equity Shares.

The recent outbreak of Novel Coronavirus has significantly affected financial markets around the world. Any other global economic developments or the perception that any of them could occur may continue to have an adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

52. Changing laws, rules and regulations and legal uncertainties may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by changes in law or regulatory environment, or interpretations of existing laws, rules and regulations, or the promulgation of new laws, rules and regulations

in India, applicable to us and our business. Any significant changes in relevant cyber security regulations, laws or regulatory environment might materially impact the Company's operations and financials. Additionally, the regulatory environment in which we operate is subject to change both in the form of gradual evolution over time and also in form of significant reforms from time to time. For instance, a notification issued by the Government of India in 2016 withdrawing the legal tender status of currency notes of ₹500 and ₹1,000, may have had and may continue to have an adverse effect on certain sectors of the Indian economy. Any such change in the future may require us to commit significant management resources and may require significant changes to our business practices and could have a material adverse effect on our business, financial condition, results of operations and prospects.

In addition, there have been various changes and proposed changes recently in the laws and regulations relating to data protection in India. Any such changes could require us to redesign our information technology systems or redesign our digital processes to comply with such laws and regulations. We cannot assure you that we will be able to redesign such systems or processes in a cost-effective manner, or at all. Since our business depends heavily on the ability of our information technology systems and digital processes, any change in the laws or regulations relating to data protection or information technology in India could have a material adverse effect on our business, financial condition, results of operations and prospects.

The governmental and regulatory bodies in India and in other jurisdictions may notify other new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, or impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, financial condition and results of operations.

53. *The Gol has implemented a new national tax regime by imposing GST. Any future increases or adverse amendments to GST may adversely affect the overall tax efficiency of our Company.*

The Gol has enacted the Central Goods and Services Tax Act, 2017 to lay a framework for a comprehensive national goods and services tax ("GST") regime that has combined taxes and levies by the Central and State Governments into a unified rate structure. The said legislation was notified and made effective from July 1, 2017. As per the GST rates notified then, our services were taxed at a rate of 18% with input tax credit. Any future increases or adverse amendments to GST may adversely affect the overall tax efficiency of our Company and may result in significant additional taxes becoming payable.

54. *A decline in economic growth or political instability nationally or internationally or changes in the Government in India could adversely affect our business.*

Our performance and the growth of our business are necessarily dependent on the health and performance of the overall Indian economy. In the recent past, Indian economy has been affected by global economic uncertainties and liquidity crisis, domestic policy and political environment, volatility in interest rates, currency exchange rates, commodity and electricity prices, adverse conditions affecting agriculture, rising inflation rates and various other factors. Risk management initiatives by banks and lenders in such circumstances could affect the availability of funds in the future or the withdrawal of our existing credit facilities. The Indian economy is undergoing many changes and it is difficult to predict the impact of certain fundamental economic changes on our business. Conditions outside India, such as a slowdown or recession in the economic growth of other major countries, especially the United States, have an impact on the growth of the Indian economy. Additionally, an increase in trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could negatively affect interest rates and liquidity, which could adversely affect the Indian economy and our business. Any downturn in the macroeconomic environment in India could adversely affect our business, financial condition, results of operation and the trading price of our Equity Shares. Volatility, negativity, or uncertain economic conditions could undermine the business confidence and could have a significant impact on our results of operations. Changing demand patterns from economic volatility and uncertainty could have a significant negative impact on our results of operations.

Further, our performance and the market price and liquidity of the Equity Shares may be affected by changes in exchange rates and controls, interest rates, government policies, taxation, social and ethnic instability and other

political and economic developments affecting India. The Gol has traditionally exercised and continues to exercise a significant influence over many aspects of the economy. Our business, the market price and liquidity of the Equity Shares may be affected by changes in Gol policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India.

55. We are subject to regulatory, economic, social and political uncertainties and other factors beyond our control.

We are incorporated in and our operations are in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include: political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;

- occurrence of natural or man-made disasters;
- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- changes in India's tax, trade, fiscal or monetary policies;
- prevailing regional conditions,
- financial instability in financial markets; and
- other significant regulatory or economic developments in or affecting India.

In addition, any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

56. If there is any change in tax laws or regulations, or their interpretation, such changes may significantly affect our financial statements for the current and future years, which may have a material adverse effect on our financial position, business and results of operations.

Having our business operations in multiple jurisdictions, we are subject to varying central and state tax regimes. The applicable categories of taxes and tax rates also vary significantly from jurisdiction to jurisdiction, which may be amended from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each country as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned, and expenditure incurred. Our business and financial performance may be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business or the regulator enforcing them in any one of those countries may adversely affect our results of operations.

To the extent that we are entitled to certain tax benefits in India which are available for a limited period of time, our profitability will be affected if such benefits will no longer be available, or are reduced or withdrawn prematurely or if we are subject to any dispute with the tax authorities in relation to these benefits or in the event we are unable to comply with the conditions required to be complied with in order to avail ourselves of each of these benefits. Please see "Statement of Tax Benefits" on page 75 for details in relation to possible tax benefits available to our Company. In the event that any adverse development in the law or the manner of its implementation affects our ability to benefit from these tax incentives, our business, results of operations, financial condition and prospects may be adversely affected.

Changes in the operating environment, including changes in tax law, could impact the determination of our tax liabilities for any given tax year. Taxes and other levies imposed by the Government of India that affect our industry include income tax, goods and services tax and other taxes, duties or surcharges introduced from time to time. The tax scheme in India is extensive and subject to change from time to time and any adverse changes in any of the taxes levied by the Government of India may adversely affect our competitive position and profitability.

We cannot assure you that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the countries in which we operate may materially and adversely affect our business, results of operations and financial condition. In addition, we may have to incur expenditure to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities. As a result, any such changes or interpretations may adversely affect our business, financial condition and financial performance.

57. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.*

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

58. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

59. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

60. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

61. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

62. *The ability of Indian companies to raise foreign capital may be constrained by Indian law.*

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

63. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

64. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchange. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Equity Shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

Our Company procures clients by bidding for tenders for which Company has to pay Earnest Money Deposit which is refundable.

We intend to increase our scale of operations for which we would be required to bid for further tenders and give Security Deposit for the same, provide extended credit period to our customers, but as stated earlier, we do not enjoy any corresponding credit facility or period from our suppliers. This would require us to have adequate working capital to ensure a smooth and uninterrupted flow of our business operations.

2) Working Capital Requirements

The Company till date has had an excellent track record in terms of its receivables; there has been very negligible default from one of its Clients in the Company's entire business history. However, the time taken to receive payments against the Invoice raised against its Clients takes an average period of 4-6 months leading to stress in working capital cycle. The fee is received mostly in one single-tranche after the completion of the Contract assignment; which essentially involves the Company obtaining final clearance and completion certificate from the Client and then raising an Invoice on them leading to subsequent release of payment. Typically, the Orders are issued by various Clients in the first and second Quarters of the fiscal year which are to be executed and completed on or before the close of that fiscal year. Thus, invariably the billing exercise take place in large numbers in the 3rd and 4th quarter of the year. We are therefore required to provide sufficient credit period to our clients resulting in high receivables and at the same time, being in service industry we do not enjoy credit from our own suppliers.

With our proposed business development and expansion plans across various cities, leading to growth in business contracts, we shall have to extend credit to all our future clients as well. Accordingly, we expect a further increase in the working capital requirements in view of current and potential business operations that we may undertake.

Also, at the time of bidding for Orders, we are to provide Security Deposit which is refunded when the contract is awarded. However, we may have to provide Performance Guarantee by way of providing Bank Guarantees towards which we may have to keep deposits with the Bank. We estimate that we may need ₹392.77 lakhs out of the issue proceeds to meet the increase in working capital requirements and Bank Guarantees. We estimate to utilize Rs. 333.03 Lakhs towards working capital requirements and balance amount Rs. 59.74 lakhs would be utilized towards Bank Guarantees

SECTION VI- ABOUT THE COMPANY

INDUSTRY OVERVIEW

The information in this chapter has been extracted from the websites of and publicly available documents from various sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with this Issue has independently verified the information provided in this chapter. Industry sources and publications, referred to in this chapter, generally state that the information contained therein has been obtained from sources generally believed to be reliable but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information.

GLOBAL ECONOMIC OVERVIEW

Global growth is projected at ~4.9 percent in 2020, 1.9 percentage points below the April 2020 World Economic Outlook (WEO) forecast. The COVID-19 pandemic has had a more negative impact on activity in the first half of 2020 than anticipated, and the recovery is projected to be more gradual than previously forecast. In 2021 global growth is projected at 5.4 percent. Overall, this would leave 2021 GDP some 6½ percentage points lower than in the pre-COVID-19 projections of January 2020. The adverse impact on low-income households is particularly acute, imperiling the significant progress made in reducing extreme poverty in the world since the 1990s.

In economies with declining infection rates, the slower recovery path in the updated forecast reflects persistent social distancing into the second half of 2020; greater scarring (damage to supply potential) from the larger-than-anticipated hit to activity during the lockdown in the first and second quarters of 2020; and a hit to productivity as surviving businesses ramp up necessary workplace safety and hygiene practices. For economies struggling to control infection rates, a lengthier lockdown will inflict an additional toll on activity.

COVID-19 Crisis: More Severe Economic Fallout than Anticipated

Economic data available at the time of the April 2020 WEO forecast indicated an unprecedented decline in global activity due to the COVID-19 pandemic. Data releases since then suggest even deeper downturns than previously projected for several economies. Few severe economic fallouts are mentioned below:

- The pandemic has worsened in many countries, leveled off in others. Following the release of the April 2020 WEO, the pandemic rapidly intensified in a number of emerging market and developing economies, necessitating stringent lockdowns and resulting in even larger disruptions to activity than forecast. In others, recorded infections and mortality have instead been more modest on a per capita basis, although limited testing implies considerable uncertainty about the path of the pandemic. In many advanced economies, the pace of new infections and hospital intensive care occupancy rates have declined thanks to weeks of lockdowns and voluntary distancing.
- Synchronized, deep downturn. First-quarter GDP was generally worse than expected (the few exceptions include, for example, Chile, China, India, Malaysia, and Thailand, among emerging markets, and Australia, Germany, and Japan, among advanced economies). High-frequency indicators point to a more severe contraction in the second quarter, except in China, where most of the country had reopened by early April.
- Consumption and services output have dropped markedly. In most recessions, consumers dig into their savings or rely on social safety nets and family support to smooth spending, and consumption is affected relatively less than investment. But this time, consumption and services output have also dropped markedly. The pattern reflects a unique combination of factors: voluntary social distancing, lockdowns needed to slow transmission and allow health care systems to handle rapidly rising caseloads, steep income losses, and weaker consumer confidence. Firms have also cut back on investment when faced with precipitous demand declines, supply interruptions, and uncertain future earnings prospects. Thus, there is a broad-based aggregate demand shock, compounding near-term supply disruptions due to lockdowns.
- Mobility remains depressed. Globally, lockdowns were at their most intense and widespread from about mid-March through mid-May. As economies have gradually reopened, mobility has picked up in some areas but generally remains low compared to pre-virus levels, suggesting people are voluntarily reducing

exposure to one another. Mobility data from cellphone tracking, for example, indicate that activity in retail, recreation, transit stations, and workplaces remains depressed in most countries, although it appears to be returning to baseline in certain areas.

- Severe hit to the labor market. The steep decline in activity comes with a catastrophic hit to the global labor market. Some countries (notably in Europe) have contained the fallout with effective short-term work schemes. Nonetheless, according to the International Labour Organization, the global decline in work hours in 2020:Q1 compared to 2019:Q4 was equivalent to the loss of 130 million full-time jobs. The decline in 2020:Q2 is likely to be equivalent to more than 300 million full-time jobs. Where economies have been reopening, activity may have troughed in April—as suggested, for example, by the May employment report for the United States, where furloughed workers are returning to work in some of the sectors most affected by the lockdown.
- The hit to the labor market has been particularly acute for low-skilled workers who do not have the option of working from home. Income losses also appear to have been uneven across genders, with women among lower-income groups bearing a larger brunt of the impact in some countries. Of the approximately 2 billion informally employed workers worldwide, the International Labour Organization estimates close to 80 percent have been significantly affected.
- Contraction in global trade. The synchronized nature of the downturn has amplified domestic disruptions around the globe. Trade contracted by close to –3.5 percent (year over year) in the first quarter, reflecting weak demand, the collapse in cross-border tourism, and supply dislocations related to shutdowns (exacerbated in some cases by trade restrictions).
- Weaker inflation. Average inflation in advanced economies had dropped about 1.3 percentage points since the end of 2019, to 0.4 percent (year over year) as of April 2020, while in emerging market economies it had fallen 1.2 percentage points, to 4.2 percent. Downward price pressure from the decline in aggregate demand, together with the effects of lower fuel prices, seems to have more than offset any upward cost-push pressure from supply interruptions so far.

Policy Counter measures Have Limited Economic Damage and Lifted Financial Sentiment

Some bright spots mitigate the gloom. Following the sharp tightening during January–March, financial conditions have eased for advanced economies and, to a lesser extent, for emerging market economies, also reflecting the policy actions discussed below.

Sizable fiscal and financial sector countermeasures deployed in several countries since the start of the crisis have forestalled worse near-term losses. Reduced-work-hour programs and assistance to workers on temporary furlough have kept many from outright unemployment, while financial support to firms and regulatory actions to ensure continued credit provision have prevented more widespread bankruptcies.

Swift and, in some cases, novel actions by major central banks (such as a few emerging market central banks launching quantitative easing for the first time and some advanced economy central banks significantly increasing the scale of asset purchases) have enhanced liquidity provision and limited the rise in borrowing costs. Moreover, swap lines for several emerging market central banks have helped ease dollar liquidity shortages. Portfolio flows into emerging markets have recovered after the record outflows in February–March and hard currency bond issuance has strengthened for those with stronger credit ratings. Meanwhile, financial regulators' actions—including modification of bank loan repayment terms and release of capital and liquidity buffers—have supported the supply of credit.

Stability in the oil market has also helped lift sentiment. West Texas Intermediate oil futures, which in April had sunk deep into negative territory for contracts expiring in the early summer, have risen in recent weeks to trade in a stable range close to the current spot price.

Exchange rate changes since early April have reflected these developments. As of mid-June, the US dollar had depreciated by close to 4 percent in real effective terms (after strengthening by over 8 percent between January and early April). Currencies that had weakened substantially in previous months have appreciated since April—including the Australian dollar and the Norwegian krone, among advanced economy currencies, and the Indonesian rupiah, Mexican peso, Russian ruble, and South African rand, among emerging market currencies.

- India retained its position as the third largest start-up base in the world with over 8,900-9,300 start-ups as 1,300 new start-ups got incorporated in 2019 according to a report by NASSCOM. India also witnessed the addition of 7 unicorns in 2019 (till August 2019), taking the total tally to 24.
- India's labour force is expected to touch 160-170 million by 2020 based on the rate of population growth, increased labour force participation and higher education enrolment among other factors according to a study by ASSOCHAM and Thought Arbitrage Research Institute.
- India's foreign exchange reserves reached Rs 37.31 lakh crore (US\$ 493.48 billion) in the week up to May 29, 2020 according to the data from RBI.

Government Initiatives

- The first Union Budget of the third decade of 21st century was presented by Minister for Finance & Corporate Affairs, Ms. Nirmala Sitharaman in the Parliament on February 1, 2020. The budget aimed at energising the Indian economy through a combination of short-term, medium-term, and long-term measures.
- Total expenditure for 2020-21 is budgeted at Rs 37.14 lakh crore (US\$ 531.53 billion), an increase of 13 per cent from 2019-20.
- Numerous foreign companies are setting up their facilities in India on account of various Government initiatives like Make in India and Digital India. Mr Narendra Modi, Prime Minister of India, launched Make in India initiative with an aim to boost country's manufacturing sector and increase purchasing power of an average Indian consumer, which would further drive demand and spur development, thus benefiting investors. The Government of India, under its Make in India initiative, is trying to boost the contribution made by the manufacturing sector with an aim to take it to 25 per cent of the GDP from the current 17 per cent. Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy.

Road Ahead

- India's GDP is expected to reach US\$ 5 trillion by FY25 and achieve upper-middle income status on the back of digitization, globalization, favourable demographics, and reforms.
- India is also focusing on renewable sources to generate energy. It is planning to achieve 40 per cent of its energy from non-fossil sources by 2030, which is currently 30 per cent, and have plans to increase its renewable energy capacity to 175 gigawatt (GW) by 2022.
- India is expected to be the third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behaviour and expenditure pattern, according to a Boston Consulting Group (BCG) report. It is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by 2040 as per a report by PricewaterhouseCoopers.

INDIAN SERVICE INDUSTRY OVERVIEW

- The services sector is not only the dominant sector in India's GDP, but has also attracted significant foreign investment, has contributed significantly to export and has provided large-scale employment. India's services sector covers a wide variety of activities such as trade, hotel and restaurants, transport, storage and communication, financing, insurance, real estate, business services, community, social and personal services, and services associated with construction.

Market Size

The services sector is a key driver of India's economic growth. The sector contributed 55.39 per cent to India's Gross Value Added at current price in FY20. Services sector's GVA grew at a CAGR of 1.45 per cent to US\$ 1,064.8 billion in FY20 from US\$ 1,005 billion in FY16. Net export estimate in FY20 from services stood at US\$ 214.14 billion, while import was at US\$ 131.41 billion in FY20.

Government Initiatives

- The Government of India recognises the importance of promoting growth in services sector and provides several incentives across a wide variety of sectors like health care, tourism, education, engineering, communications, transportation, information technology, banking, finance and management among others.
- The Government of India has adopted few initiatives in the recent past, some of these are as follows:
- The Cabinet Committee on Economic Affairs has given its approval for continuation of the process of recapitalization of Regional Rural Banks (RRBs) by providing minimum regulatory capital to RRBs for another year beyond 2019-20.
- Government of India has launched the National Broadband Mission with an aim to provide Broadband access to all villages by 2022.
- Under the Mid-Term Review of Foreign Trade Policy (2015-20), the Central Government increased incentives provided under Services Exports from India Scheme (SEIS) by two per cent.
- Government of India has been working to remove many trade barriers to services, for which it tabled a draft legal text on Trade Facilitation in Services to the WTO in 2017.

Road Ahead

- Services sector growth is governed by domestic and global factors. The Indian facilities management market is expected to grow at 17 per cent CAGR between 2015 and 2020 and surpass the US\$ 19 billion mark supported by booming real estate, retail, and hospitality sectors.
- By 2023, healthcare industry is expected to reach US\$ 132 billion. India's digital economy is estimated to reach US\$ 1 trillion by 2025. By end of 2023, India's IT and business services sector is expected to reach US\$ 14.3 billion with 8 per cent growth.

INDIAN IT AUDIT INDUSTRY

Businesses worldwide, and more so in India, are becoming paperless with the aggressive transition to digitization and computerized information systems. 'Digital India' initiative of the Government of India is a visionary step in the right direction to accelerate digital empowerment, online infrastructure development and increased internet connectivity.

With rapid pace of growth in digitization; corporate governance of information systems and fail-safe security control measures to safeguard transactions, data and its privacy have become imperative and the need of the hour.

The twentieth century has brought to reality the idea of a global village, where digital technology has interconnected and emeshed the world economies, cultures and populations. Over half a billion people in India use the internet today making it the second largest internet population in the world, and this number is expected to register double-digit growth in the next few years. Rising internet usage, together with millions of smartphone users and growing mobile data traffic, sets the context for transformational change in the country.

While greater connectivity via the world wide web promises large-scale progress, it also leaves our digital societies open to new vulnerabilities. Cyber-crimes know no borders and evolve at a pace at par with emerging technologies.

The new generation in India is clearly 'mobile first', with 1.16 billion mobile phone subscriptions and more than 12.3 billion apps being downloaded in 2018 alone. Corporate India is gearing up to meet these growing needs, through its investments in various initiatives and emerging technologies. Realizing the several benefits of emerging technologies, the government has also enrolled more than 1.24 billion Indians in its biometric digital identity programme Aadhaar, and brought more than 10.3 million businesses under a common digital platform, through the Goods and Services Tax (GST). The average daily government eTransactions has moved up from 20 million in 2015, to close to 143 million in 2019.

Cyber security breaches across organizations have become common place, regularly grabbing headlines that alarm both consumers and leaders.

In the last few years, cyber criminals have shifted their focus to developing markets like India—which has boarded the digital bandwagon in a big way and where different organizations are at different levels of maturity to fight off cyberattacks. As a result, Indian organizations across sectors are vulnerable to cyberattacks and there have been reported breaches in the recent past causing concern to both governments and businesses.

In fact, according to a 2017 report, Indian consumers had lost over 18 billion U.S. dollars due to cyber-crimes. In 2018, there were over 27 thousand cases of cyber-crimes recorded in the country, marking an increase of over 121 percent compared to the number of cases just two years back. While the nature of crimes ranges from petty online frauds to lottery scams and sexual harassment, the most targeted crimes seem to be in the banking and finance sector.

Even then, it is important to remember that cyber vulnerabilities aren't just limited to private sectors. Some of the most dangerous data breaches have been with respect to government data.

Along with economic losses, cyber-crimes also impact public safety- especially for minors and vulnerable sections of the society through incidents of cyber bullying and exploitation. In 2018 alone, India recorded over two thousand cases of cyber crimes related to sexual harassment and over 700 cases of cyber bullying against women and minors. Perhaps these high number of cases had led to an increased awareness about the issue of cyberbullying, and a large share of Indians felt that the responsibility for abusive behavior on social media lay with both the users as well as social media platforms.

However, one of the biggest impediments in curbing cyber-crimes has been the lack of awareness on cyber hygiene leading to critical digital vulnerabilities. Most cyber-crime incidents in India went unreported. And even when crimes were reported to authorities, the infrastructure and process to tackle such cases were largely inefficient. On the bright side, in 2018 the Indian government launched its National Cyber Crime Reporting Portal for citizens to register their complaints online. Under this initiative, cyber cells in various cities across the country have also been training police and government employees how to handle digital security incidents and increase public awareness at the same time.

Alarmed by these developments, regulatory attention towards cyber security has gradually increased and there is a greater focus on pushing more organizations into adopting the minimum-security baseline. While banks have already started feeling the heat after the Reserve Bank of India (RBI) imposed penalties over non-compliance in the last one-year, other industries are not far behind. Regulators are taking cues from global headwinds and crafting their cyber security mandates. Both central and state governments have also stepped up their vigil to protect against and respond to breaches.

However, the effect of these three drivers, viz. rapid digitization, increasing cyber threats and regulatory focus on cyber security, varies widely across sectors and enterprises. Larger and more mature organizations have already undergone the initial grind and have incorporated cyber security as part of their strategic initiatives. Sectors such as energy, healthcare and manufacturing are emerging with their own unique cyber security challenges. Although the demand from these sectors for strong security mechanisms is still catching up, they hold a promising future for cybersecurity.

The number of cybercrime cases went up in India in 2019. The debate on whether technology is a boon or bane continues and the fact is that India moves accelerates the process of digitization, the more exposed everybody is including their data and their privacy to innovative fraudsters.

A large number of population are apprehensive that their identities would be stolen.

About 131.2 million people were victims to cybercrime in India in 2019, compared with 350 million worldwide. Rs 1.24 trillion is the amount lost in India in the past 12 months due to cybercrime. A strong majority of Indians are alarmed about their privacy with the global average being 67%. 4 in 10 consumers in India have experienced identity theft, with 10% impacted in the past year.

63% Indians of the 131 million cybercrime victims in India, were impacted financially. 80% Indians have been a victim of cybercrime at some point in their lives, with 66% victimized in the past year.

63% Indians do not know what they will do if their identities are stolen, even though 70% are worried that the identities will be stolen.

41% Indians are concerned their sensitive personal information will be sold to third parties and used without their consent. 86% Indians are the most proactive in the world in looking for better ways to protect their privacy, compared with 65% globally.

This has alarmed the industry and banking sectors and need for Audit of systems has increased manifold times thus making Audit in Information Technology a promising industry.

In view of experts, cyber security is invariably assuming central importance and new age technologies are facilitating this development further.

As per NASSCOM-McKinsey Vision 2025, cybersecurity has been identified as a major growth vertical, along with Cloud and Big Data. Chief information officers cite cybersecurity as one of their top three priorities, and companies are seeking increasingly sophisticated protection. This is estimated to create a growth trajectory that will propel India into a global hub for cybersecurity.

From the standpoint of statistics, the industry generated a cumulative revenue of ~ USD 4.3 Bn in the year 2019 and this is expected to reach USD ~7.6 Billion in 2022. It will be registering an overall CAGR of ~21% by 2025. The current estimated employee base of the cybersecurity services companies is 110K which will be scaling up significantly in times to come. It is worth noting that 40-50% of the companies surveyed, have been mentioned in leading analyst reports for their MSS, cloud and infrastructure, MDR, VAPT, IAM and consulting services 60% of the companies have been operating successfully for more than two decades.

The Indian IT industry has been continually reinventing itself by stepping up focus on R&D, talent development, global partnerships and has crossed \$190+ Billion during FY 19-20. Cyber Security Services has emerged as a growth vertical for Indian IT Industry growing at a CAGR of 20%+.

The organizations are shifting focus to proactive and preventive measures, while augmenting their R&D reports to meet the rising scale and complexities of cyberattacks. AI/ML and Big Data/Analytics are highly preferred technologies for creating next-gen solutions, while IoT and cloud are acting as upcoming areas of focus.

Also, a shift in service delivery model is being witnessed, as the Industry is moving to holistic offerings and value creation. Indian cybersecurity services companies are expanding their global presence because of demand for security from within and outside India, coupled with their unique value proposition.

India's Digital economy is on a fast-paced growth trajectory to realize \$1 Trillion by 2025. Indian IT Services Industry has been a key growth pillar of the economy, and a preferred Digital Transformation partner for global enterprises across the world.

Cyber Security Services

Security testing and incident response to lead growth in demand for cyber security services. The cyber security services market has been classified in five categories for clearer understanding, viz. security consulting, security implementation, security testing, security operations and incident response:

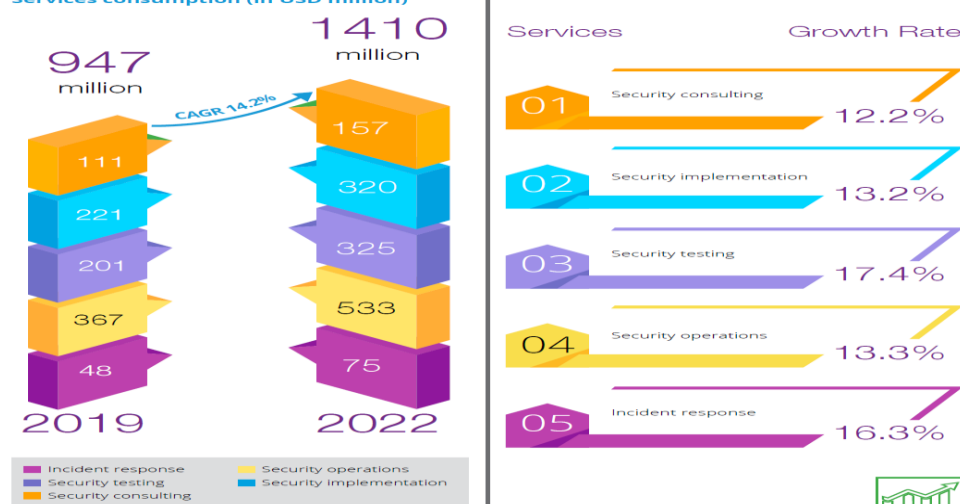

Security testing is expected to grow at the fastest rate due to rapid digitization, increase in the number of connected devices and increased integration between information technology and operational technology.

Incident response related services are growing due to increase in number and complexity of security breaches. Organizations proactively resort to cyber forensics to address vulnerabilities in security systems, post a breach.

Security operations continues to be the most dominant service category, occupying 38% of the service mix. Organizations are investing in services for visualizing new threats, monitoring them continuously, adhering to compliance guidelines and defusing potential breach incidents in the consistently widening zone of cyberthreats.

Security Testing Services

The security testing services market includes penetration testing, web testing, application security, audits and reviews. It is estimated that the security testing services market in India would increase from USD 201 million in 2019 to USD 325 million by 2022, at a CAGR of 17.4%. Security testing services will comprise 23% of the services market share, as against 21% share in 2019.

Connected devices and rapid increase of IoT requires better security testing of the same. According to a NASSCOM report, the number of IoT devices in India are expected to reach 1.9 billion by 2020.	Stringent regulatory mandates related to cyber security have made it essential for organizations to invest in security testing. The RBI started this regulatory practice and more regulations across industries are expected.	Businesses are expected to plan spending a significant share in performing Red/Blue and Purple team assessments to test detection and response capabilities of security systems.

Evolution of attacks

Cyberattacks in the BFSI sector have evolved from merely being about cybercrime to efforts in crippling the economy. Sophistication of cyberattacks are increasing as financial institutions (FIs) continue to learn and bounce back from less sophisticated attacks. Hackers are exploring new attack channels and deploying multi-vector attacks. In-order to maximize returns from cyberattacks, hackers are increasingly targeting 'core banking systems.

Sectoral Analysis

- BFSI,
- IT/ITeS and
- Government

are the top 3 sectors with the largest market share in cyber security expenditure in India.

BFSI

The importance of India's BFSI sector makes it a prime target for hackers.

The BFSI sector accounts for 26% of the total expenditure in the cyber security market. The sector is expected to increase its expenditure to USD 810 million from the existing USD 518 million by 2022, at a CAGR of 16.1%. The growth can be attributed to several factors such as tightened directives from regulators, rapid adoption of technologies like digital lending, utility payments, e-commerce, online insurance marketplaces and mobile banking— to drive operational efficiency and customer convenience.

- Digital disruption has forced companies to take a look at their digital strategies. Digital payments in India will increase from USD 64.8 billion in 2019 to USD 135.2 billion in 2023, at a CAGR of 20.2%.
- Innovation in payments technology using AI, blockchain, IoT and real-time payments, and the introduction of mobile point of sale (POS) devices has also contributed to the growth of potential security risks.

The nature of services provided by the BFSI sector has resulted in the sector being governed by detailed prescriptive guidelines and regulations.

- Regulations are becoming 'granular' and 'tighter' and at the same time, more segments of regulations are coming into the ambit.
- Risks due to usage of legacy systems and applications remain high, but regulators are also considering risks being brought by emerging technologies to the BFSI sector.
- Increased enforcement of cyber security laws and rules. For example, between January and February 2019, the RBI levied stringent fines (USD ~10.16 million) on 36 public, private and foreign banks for non-compliance with cyber security rules.

Evolution of attacks

Cyberattacks in the BFSI sector have evolved from merely being about cybercrime to efforts in crippling the economy.

- Sophistication of cyberattacks are increasing as financial institutions (FIs) continue to learn and bounce back from less sophisticated attacks.
- Hackers are exploring new attack channels and deploying multi-vector attacks.
- In-order to maximize returns from cyberattacks, hackers are increasingly targeting ‘core banking systems.

Threats and awareness on privacy are driving the demand for cyber security in the IT and ITeS sector

The cyber security spend in the IT/ITeS sector is expected to grow from USD 434 million in 2019 to USD 713 million by 2022, at a CAGR of 18% – the highest among all sectors.

It is estimated that by 2021, there will be 1.5 networked devices per individual.³⁰ With the IT sector being one of the largest employers globally, there is a huge upsurge expected in the number of end points, which have lately been identified as the most vulnerable point of entry for cyberattacks.

(Source: DSCI Report – Cybersecurity India Market what lies beneath, December 2019)

Government’s push for cyber security is largely driven by the Digital India initiatives.

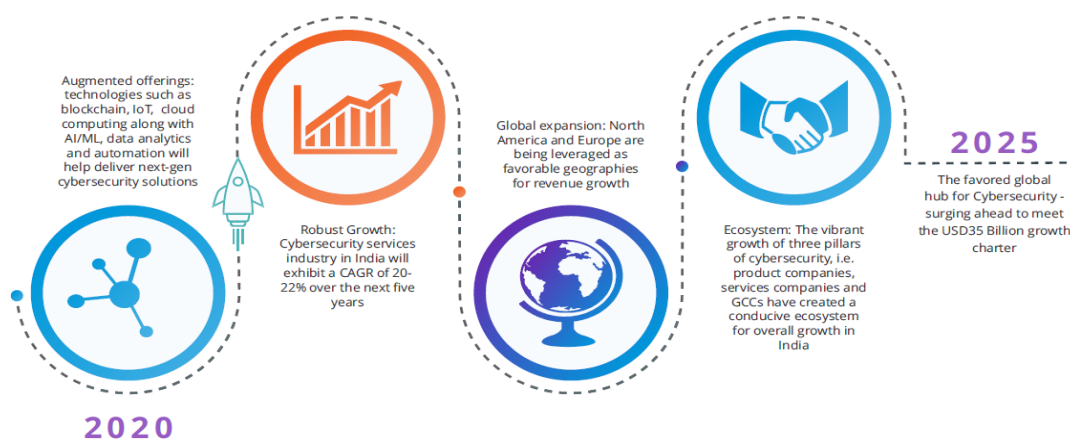

The cyber security market in the government sector is estimated to grow from USD 395 million in 2019 to USD 581 million by 2022, at a CAGR of 13.8%. This growth is primarily driven by increased focus on digitization of government systems and rising cyberattacks on critical state infrastructure.

ROAD AHEAD

Over the next five years, holistic next-gen security service offerings, growing global footprint, and a conducive business ecosystem are set to make India a favorable hub for cyber security services.

The Industry is now moving towards establishing itself as a global hub for Cyber Security. Government of India is enabling talent and skills development in Cyber Security in both Academia and Industry to build the next-gen technology competencies for Cyber preparedness of Global enterprises

COVID-19 IMPACT ON CYBERSECURITY ADOPTION AND INCREASE IN THREAT VECTORS.

- The efforts taken by organizations to ensure business continuity during the COVID-19 pandemic have also increased their exposure to cyberthreats.
- Largescale adoption of work-from-home technologies and heightened activity on customer-facing networks has increased the overall surface area of cyberattacks.
- While the world is focused on the health and economic threats posed by COVID-19, cyber criminals around the world undoubtedly are capitalizing on this crisis.
- Enterprise spending on cloud security solutions is predicted to increase from \$636 Mn in 2020 to \$1.63 Bn in 2023.
- IT spending on cyber is increasing; however, lack of strategized cyber spending plans is leading to increase in cyberattacks, 70% of all breaches originate at endpoints.
- In the US, 87% of enterprises across all sectors witnessed mobile threats which grew at the fastest rate in 2019, outpacing other threat types, based on Verizon's 'Mobile Security Index 2019'.
- There has been a 667% increase in spear-fishing e-mail attacks related to COVID-19, since the end of February 2020.

OUR STRATEGIES:

Better working capital management

Our Company procures clients by bidding for tenders for which Company has to pay Earnest Money which is refundable once the Order is awarded to us or any other applicant. Once the Company receives the Order, it has to furnish Security Deposit by way of Bank Guarantee (BG) which is refundable once the contract is completed. Further, the Company receives fees from its Clients in one or two tranches during the entire tenure of the Contract depending on successful completion of milestone or receipt of final clearance for completion of Audit from the authorities concerned. Thus, we are required to provide sufficient credit period to our clients resulting in high receivables and at the same time, being in service industry we do not enjoy credit from our suppliers. To increase our scale of operations, we require to bid for further tenders and give Earnest Money Deposit/Security Deposit which is usually refunded once the contract is awarded. Subsequent to that, our Company may need to provide Performance Guarantee which needs to be obtained from our Bank towards which the adequate deposits need to be in place with the Bank. Besides, this we have provide extended credit period to our customers. This requires us to have adequate working capital to ensure a smooth and uninterrupted flow of our business operations. This strategy requires a strong working capital position. Hence, we intend to raise funds from the IPO and ensure we have available liquidity and resources ensuring better working capital management both in terms of our ability to bid for further and larger orders and also by way having financial strength to sustain the high receivables cycle.

Expansion of our Service Portfolio

With the requisite knowledge and experience in the industry, we already offer various services in IT Audit Services. However, this being a niche industry, there lies an opportunity to expand our service portfolio. We continue our aim to provide increased service offerings to our clients which will help us retain them through better relationship and service and increase our client base. With the strength of our team, we believe we will be in a comfortable position to take strategic decisions relating to betterment of our company and as and when the opportunity presents, consolidate our range of services and our presence.

Strengthen the brand name

We intend to further increase the brand recognition through improved quality of services, communication and various initiatives, like bidding for various tenders, timely delivery of audit reports, empaneling with different organizations etc. The same would enhance the visibility of our brand name and enhance our position and image in the industry. This is also in line with the fact that we will be the first listed Company in our industry in India and once we are a listed company on the SME Platform, our visibility will further improve.

Minimize concentration risk by diversifying the portfolio of services and expanding our customer base

We intend to further improve the diversity of our service portfolio to cater to the various needs of our clients and increase the income derived from IT Audit services. We intend to leverage our office network to develop complementary business segments and become the preferred provider of IT Audit services - a one-stop shop for our customers' audit needs. We expect that our diverse revenue stream will reduce our dependence on any particular service which will enable us to spread and mitigate our risk exposure to any particular industry, business, and geography or customer segment. Offering a wide range of service helps us to attract more customers and to increase our scale of operations.

Continue to attract and retain talented employees and ensure a low attrition rate among senior management

As part of our business strategy, we are focused on attracting and retaining high quality talent. We recognize that the success of our business depends on our employees, in particular, as we continue to expand our operations. We have recruited and retained talented employees. We expect to continue to attract talented employees through our retention initiatives. We intend to invest a significant amount of time and resources for training our employees, which we believe would foster mutual trust, improve the quality of our customer service and place further emphasis on our continued retention.

An Audit in Three Parts

The cyber security audit and review process contribute to cyber security audit success. Internal auditors and risk management professionals have key roles to play, as does enterprise management.

Management — Management ultimately owns the risk decisions made for the organization. Therefore, it has a vested interest in ensuring that cyber security controls exist and are operating effectively. Decisions are typically made based on guidance received during the risk management processes, on the appropriate direction to take.

Risk Management — Risk assessments are typically made based on guidance by the security officer at an organization and enterprise management make decisions, employing risk management processes. The objective in any risk assessment is twofold.

First, it is critical to communicate the state of the risk so that it is easy to understand and be clear on the level of risk involved.

Secondly, and just as significantly the ways in which to address that risk must be identified as well. This provides both problem and solution, and mitigates the negative impact of that risk to an enterprise.

The risk landscape is ever-changing. It is important to have defined processes, trained and competent cyber security resources, and a governance framework to ensure that appropriate actions are carried out by enterprise leadership and managed effectively to address current and emerging threats.

Internal Audit — Auditing is a security measure. It is critical to protecting an enterprise in today's global digital economy. The internal audit department plays a vital role in cyber security auditing in many organizations, and often has a dotted-line reporting relationship to the audit committee to ensure an independent view is being communicated at the board level of the enterprise. Audit helps enterprises with the challenges of managing cyber threats, by providing an objective evaluation of the controls and making recommendations to improve them as well as assisting the senior management and the board of directors understand and respond to cyber risks. Organizations, especially within the public sector, also contract for the services of external auditors to provide independent assurance of the financial and operational controls primarily to ensure the controls design is effective and the needs of the organization are being met.

COMPETITION

We are empanelled with CERT-In as IT Security Organization and are one of the few Companies empanelled with NICS.

Empanelment with CERT-In helps us to bid for contracts and secure audits of Companies who float their tenders. Our ability to secure tenders will depend on our eligibility for technical bids, our track record of completion of audits in past both in terms of time and quality in comparison with other competitors and our ability to bid the lowest in financial bid. Further, there are some other common factors which affect our eligibility criteria to bid for the tenders which are number of employees, tools available for audit, qualification of the employees and directors, location of the Company etc.

Our empanelment with NICS helps us procure direct business from the Companies without going through tender process. Hence, to procure work from Government, statutory bodies etc. our clear competitors. are all the Companies empanelled with NICS and CERT-In.

Apart from CERT-In and NICS I we also are directly empanelled or were empanelled with Companies/ Government Bodies / Statutory Authorities / Central Bank / Stock Exchanges / PSU Banks from where we secure direct business on repeat order basis.

In order to reduce time and procure Orders more efficiently, the above-mentioned organizations and many more calls for CERT-IN empanelled IT Security Organization having requisite work experience and technical qualifications required/desired by such Client organizations to apply for empanelment (for their future work orders for an general 3-5 year period), then as and when work is generated, they may award to contracts to all or any one or more of them.

Apart from Government, statutory bodies etc. our Company also faces competition to procure business from private sector companies. Our ability to secure contracts from private companies depends upon our quality, ability to complete, innovation, reputation, pricing by other Competitors and our relationship with the clients.

In addition, it is possible that certain established service companies may decide to begin offering services that we currently provide and new players might enter the market, thereby further intensifying the competition. Our growth will largely depend on our ability to respond in an effective and timely manner to these competitive pressures. Thus, we face competition from organized and unorganized players in the industry but there is no clear identifiable competitor who are listed.

Earnings Per Share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares that have changed the number of equity shares outstanding, without a corresponding change in resources. COMPETITION:

We are empanelled with CERT-In as IT Security Organization and are one of the few companies empanelled with NISCI.

Empanelment with CERT-In helps us bid for contracts and secure audits of Companies who float their tenders. Our ability to secure tenders will depend on our eligibility for technical bids, our track record of completion of audits in past both in terms of time and quality in comparison with other competitors and our ability to bid the lowest in financial bid. Further, there are some other common factors which affect our eligibility criteria to bid for the tenders which are number of employees, tools available for audit, qualification of the employees and directors, location of the Company etc.

Our empanelment with NISCI helps us procure direct business from the Companies without going through tender process. Hence, to procure work from Government, statutory bodies etc. our clear competitors. are all the Companies empanelled with NISCI and CERT-In.

Apart from CERT-In and NISCI we also directly empanelled or was empanelled with Companies / Government bodies/ Statutory Authorities like Reserve Bank of India (RBI), National Stock Exchange (NSE), Bombay Stock Exchange (BSE), Securities and Exchange Board of India (SEBI), Multi Commodity Exchange (MCX), National Highway Authority of India (NHAI), Punjab and National Bank (PNB), State Bank of India (SBI) from where we secure direct business on repeat order basis.

Apart from Government, statutory bodies etc. our Company also faces competition to procure business from private sector companies. Our ability to secure contracts from private companies depends upon our quality, ability to complete, innovation, reputation pricing by other Competitors and our relationship with the clients.

In addition, it is possible that certain established service companies may decide to begin offering services that we currently provide and new players might enter the market, thereby further intensifying the competition. Our growth will largely depend on our ability to respond in an effective and timely manner to these competitive pressures. Thus, we face competition from organized and unorganized players in the industry but there is no clear identifiable competitor who are listed.

Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a RIB had the option to submit the ASBA Form with any of the Designated

Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the ASBA Form without UPI by RIBs to Designated Intermediaries (other than SCSBs) for blocking of funds will be discontinued. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase. SEBI vide its circular no.SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 extended the timeline for implementation of UPI Phase II till March 31, 2020.
